# Synchronotron
Introduction

The system of Synchronotron is a tool for learning the mathematical language of telepathy, which is coded into the Law of Time. It is a teaching from Sirius that contains the language of post-conceptual mind.

Sirius is a binary star – Sirius A and Sirius B. It takes Sirius B approximately 52 years to go in an orbit around Sirius A. This is the basis of the 52- year solar galactic cycle (and why the **galactic compass** is also called the Sirian Wheel).

Synchronotron refers to the compendium of the practices of the 441 (21 x 21) cube matrix system. This mathematical system represents the minimum fractal of totality cubed: 21 x 21 being the prime statement of totality (20) + 1 (unity). $1 + 2 + 3 + 4 + 5 + 6 = 21$ (unity of totality).
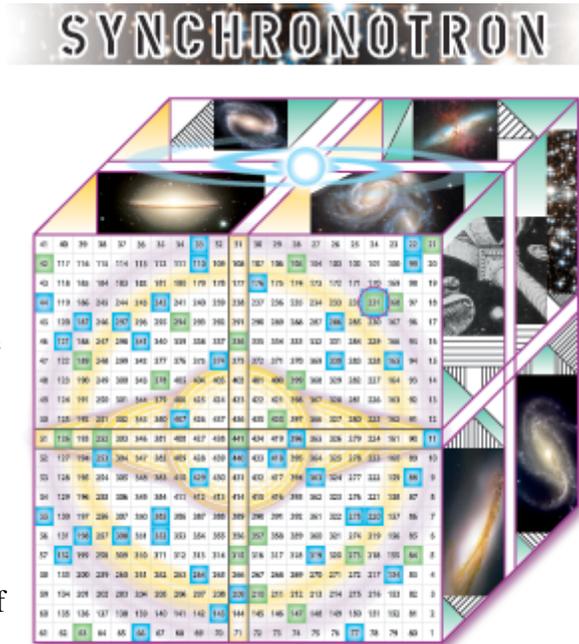

This system was revealed to José Argüelles/Valum Votan 18 years after the discovery of the Law of Time (1989). It began with a dream initiation at the beginning of the Resonant Moon, Red Magnetic Moon Year (January 10, 2007), Kin 117. The number 441 was heard in a dream instigating an on-going process of decoding. He discovered that this 441 cube matrix is a living system of information transmission that is always occurring; the cube is being transmitted to the larger mental field of the solar system and then into the planet.

The second stage of this transmission occurred eight moons later when a cube crop circle appeared at Sugar Hill in Wiltshire, reported on August 1, 2007 (Magnetic Moon 7, Cube 1, Kin 54 year, Kin 60, Long Count 11 Chuen, Kin 11). On the night that this appeared Valum Votan dreamed that he was taken to the center of the cube matrix.

The crop circle contained 18 cubes, 54 faces, and 144 triangles. It was the year Kin 54 (2007) and he perceived this as the clear sign that the Kin 54 year marks the entrance into the 6 cubes of the interdimensional shift. The measure of the first six cubes define the interdimensional shift:

$6^3 = 216 = 2$ Wizard Year
$5^3 = 125 = 3$ Storm Year
$4^3 = 64 = 4$ Seed Year
$3^3 = 27 = 5$ Moon Year
$2^3 = 8 = 6$ Wizard Year
$1^3 = 1 = 7$ Storm Year

This crop circle occurred on the cubing of the first heptad of the fourth ring of the Mystery of the Stone: $54 \times 4 = 216$. This occurred at the beginning of the Monkey Genesis—20 Tablets, Cube 11: 2007- 2008. "Monkey Genesis Anchors Magic of Lunar Earth Wizards."

After three years of daily work with this system, the Synchronotron was finally presented publicly at the 7-day Advanced Training Seminar, Babaji Ashram, Cisternino Italy, Lunar Moon 15-21, 4 Seed Year. This seminar is referred to in some of the Intergalactic Bulletins that elucidate different facets of the Synchronotron system.

The ultimate purpose of learning the 441 cube matrix system is to learn how to operate the Holomind Perceiver, a new sense organ located in the corpus callosum (see *Book of the Cube*). The Holomind Perceiver facilitates the integration of time, space and mind as the principle of radialized synchronization informing the totality of our being. Then we can begin to learn the language of telepathy or the language of Number.

This is a new cosmology based on the eleventh-dimensional system of the cube. It is a telepathic language referencing system that has nothing to do with historical modes. Within this system are various levels of hierarchical command and coding. Anything can be reduced to number and placed into this system.

When studying this system, it is helpful to keep in mind the following:

1. Number is frequency.
2. Number is the basis of all creation.
3. Everything in creation is based on Number.
4. Number is the primary, exalted language; it precedes and evolves language.
5. After language, there is Number.
6. Number is the telepathic frequency language based on complete whole number mathematics.
7. Number is a dimension, just as space is a dimension and time is a dimension. (where there is Number, there is mind).
8. Number creates order out of time and space.
9. All is number. God is a number. God is in all.
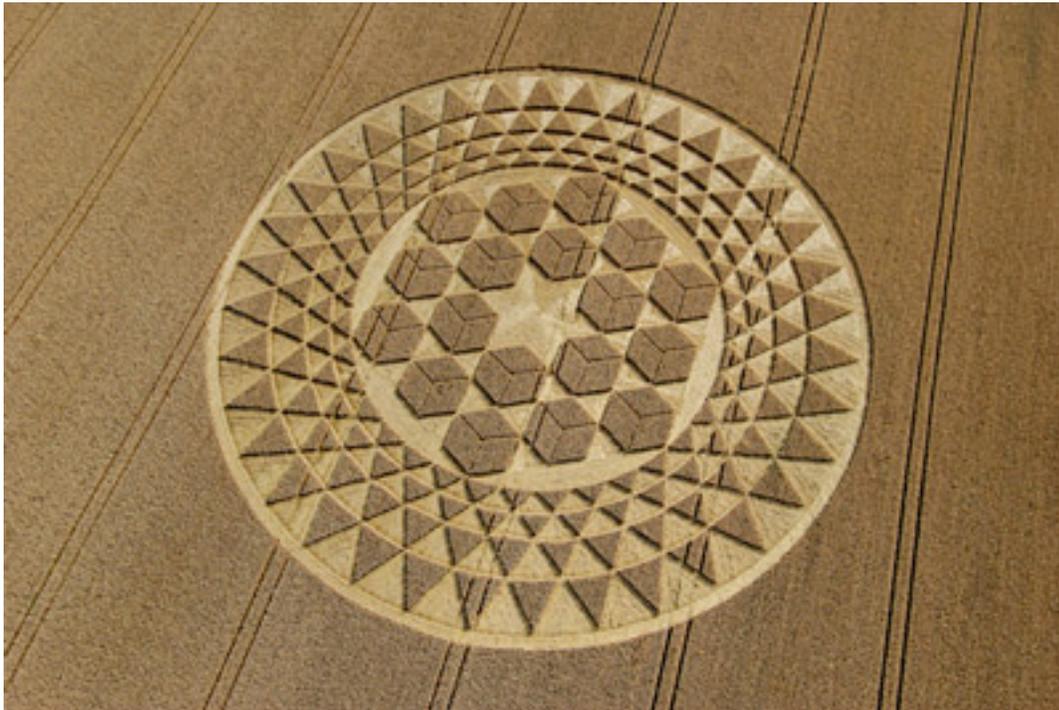

Introducing the 441 Matrices

The Synchronotron is an advanced practice of the synchronic order based on the Law of Time. Synchronotron refers to the practice of the 441 cube matrix system or 21² (1.2.1 vigesimal code) and ultimately 21³ (1.3.3.1 vigesimal code). This system consists four primary matrices (and a fifth master matrix) that are coordinated by the moving patterns of the synchronic order and can be accessed daily through the 13 Moon calendar date and galactic signature.

The four basic matrices include: **time matrix, space matrix, synchronic matrix** and **base matrix** (plus a fifth master matrix: *holomind perceiver)*. The **time, space,** and **synchronic** matrices are the three coordinating matrices. The **base matrix** is the anchor that overlays into the **holomind perceiver**, which is a synthesis and map of the new brain of the galactic mind.

Working with these matrices is an exercise in mind expansion and conscious evolution. Through study of these matrices as well as the *Cosmic History Chronicles,* we break the mental limitations and penetrate into other worlds and dimensions. Once engaged, the cube system becomes a living system.

Time Matrix

Space Matrix

Synchronic Matrix

Base Matrix

[Click here to download printable versions of the four matrices](http://www.lawoftime.org/pdfs/441CubeMatrices.pdf)
You'll need these to continue learning this practice!

http://www.lawoftime.org/pdfs/441CubeMatrices.pdf

Each unit on each of the matrices has a coordinate. Coordinates are written V,H - Vertical and Horizontal - each vertical column and each horizontal row is numbered 1-21. Horizontal rows are numbered H1 at the top and H21 at the bottom. Vertical columns are numbered V1 at the far left and V21 at the far right.

For example, below are five coordinates. To practice locating numbers on the matrices, use your printed 441 Matrices to find these coordinates on each of the four matrices:

- **V1,H1 (top-left corner)**
  Time Matrix: 1 - Space Matrix: 278 - Synchronic Matrix: 1 - Base Matrix: 41

- **V21,H1 (top-right corner)**
  Time Matrix: 48 - Space Matrix: 313 - Synchronic Matrix: 42 - Base Matrix: 21

- **V1,H21 (bottom-left corner)**
  Time Matrix: 97 - Space Matrix : 348 - Synchronic Matrix: 21 - Base Matrix: 61

- **V21,H21 (bottom-right corner)**
  Time Matrix: 144 - Space Matrix: 383 - Synchronic Matrix: 22 - Base Matrix: 1

- **V11,H11 (center of the matrix)**

  Time Matrix: 117 - Space Matrix : 441 - Synchronic Matrix: ‥ - Base Matrix: 441

How to Enter the 441 Cube Matrix

Now that you're familiar with how to locate coordinates on the 441 Matrix, we can proceed with the instructions for finding the Telepathic Frequency Index, both for your date of birth and for the daily 441 Synchronotron Cube practice.

Through a simple process, each day we arrive at a *Telepathic Frequency Index* number (TFI). To find the daily telepathic frequency index (TFI), you first need to know the 13 Moon calendar date and the Galactic Signature Kin number. (You can find this on www.lawoftime.org or through the *Star Traveler's 13 Moon Almanac of Synchronicity* or pocket calendar.)

Each day has three coordinates that interlock or overlay each other. The first step to enter this system is to simply find the numbers on the matrices for each of these three coordinates.

To deepen your practice of the Synchronotron, study the *Cosmic History Chronicles*, particularly *Volume VII: Book of the Cube*.
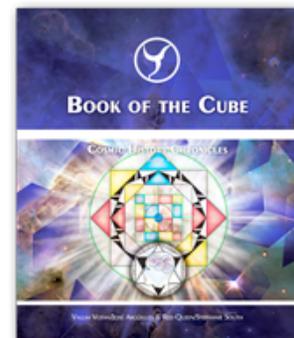

0. Heptad Gate

Before you begin, you first take note of the daily Heptad Gate: Dali, Seli, Gamma, Kali, Alpha, Limi or Silio. The seven radial plasmas are not only each of the seven chakras, but also open seven Heptad Gates in the brain. Click here to download the diagram illustrating the seven Heptad Gates. http://www.lawoftime.org/pdfs/441HeptadGates.pdf

The Seven Radial Plasmas and their corresponding Heptad Gates are:

Dali - base of skull - Base Matrix Unit (BMU) 108 - V11,H2

Seli - middle back of head - BMU 291 - V11,H5

Gamma - third eye - BMU 144 - V11,H20

Kali - just above third eye - BMU 315 - V11,H17

Alpha - front center of skull - BMU 414 - V11,H14

Limi - back top of skull - BMU 402 - V11,H8

Silio - center of skull - BMU 441 - V11,H11

For detailed information on the Heptad Gates study Chapter 5 of *Book of the Transcendence, Cosmic History Chronicles Vol. VI*.

1. Time Matrix

The Time Matrix coordinate is determined by the 13 Moon calendar date. Notice how the Time Matrix is divided into nine sections - these are known as the Nine Time Dimensions. The sections shaded in orange in the graphic are the Four Outer Time Dimensions - all 13 Moons of 28 days each (364 days) are contained in these Four Outer Time Dimensions, also called the Four Seasons of Time (The Day out of Time and 0.0.Hunab Ku/leap day are located at the very center of the matrix). Note that each of the Four Time Dimensions is a 7x7 matrix = 7 rows of 7 units each. These rows correspond to the 7-day heptad (week) of the 13 Moon calendar.

The following graphic illustrates how all 13 Moons (13x28=364) of the 13 Moon calendar flow through the Four Outer Time dimensions:

13 MOON/28-DAY CALENDAR
LOCATED IN THE FOUR OUTER TIME DIMENSIONS OF THE TIME MATRIX

MOONS 1-7 BEGIN AT V1,H1 AND MOVE LEFT-TO-RIGHT TOP-TO BOTTOM
MOONS 8-13 BEGIN AT V21,H20 AND MOVE RIGHT-TO-LEFT BOTTOM-TO-TOP

MOONS 1-6 MIRROR MOONS 8-13. MOON 7 HAS NO MIRROR.
When finding your Telepathic Frequency Index for the Time Matrix first check any 13 Moon calendar to find your 13 Moon birthdate (Example: July 26 = Magnetic Moon 1 = 1.1)

Then refer to the chart above to find the location of your 13 Moon birthdate in the 441 Matrix. Write down the horizontal and vertical vector points. (Example: Resonant Moon 15 = 7.15 = **V1,H21**)

EXAMPLES:

V1,H1 | 1.1 / 13.28 = Magnetic Moon 1 (July 26) / Cosmic Moon 28 (July 24)

V1,H21 | 7.15 = Resonant Moon 15 (Jan 24)

V21,H20 | 6.28 / 8.1 = Rhythmic Moon 28 (Jan 9) / Galactic Moon 1 (Feb 7)

Study the diagram to become familiar with how the 13 Moon calendar date fits perfectly into the Four Matrices of Outer Time. Note that for Moons 1-7 the count proceeds left-to-right, top to bottom. Then from Moons 8-13 the count reverses. Here are some sample dates you can look up to get started:

- Magnetic Moon 1 (V1,H1)
- Magnetic Moon 28 (V21,H15)
- Self-Existing Moon 1 (V1,H4)
- Resonant Moon 28 (V21,H21)
- Galactic Moon 1 (V21,H20)

- Galactic Moon 8 (V7,H20)
- Galactic Moon 15 (V21,H6)
- Galactic Moon 28 (V1,H6)
- Cosmic Moon 1 (V21,H15)
- Cosmic Moon 28 (V1,H1)

Now, for your daily Synchronotron practice, locate the 13 Moon date position on the **Time Matrix**. Write down the vertical and horizontal vector points. Then find the number overlays on the space matrix and on the synchronic matrix. You should now have three numbers. Add them up. The sum of these three numbers is the **Telepathic Frequency Index (TFI) for the Time Matrix.** Also take note of the Base Matrix Unit (BMU) in this vector.

Note: The BMU is not counted in the daily Telepathic Frequency Index. It simply locates the coordinate in its absolute position and gives it a vector point as well as absolute frequency within the 441 matrix.

2. Space Matrix

Next, locate the Kin number on the **Space Matrix**. Write down the vectors, and find the number overlays on the time matrix and synchronic matrix. This is your next set of three numbers. Add them up. The sum of these three numbers is the **Telepathic Frequency Index (TFI) for the Space Matrix.** Again take note of the BMU in this vector.

3. Synchronic Matrix

The daily Kin number is also located in the *Tzolkin* within the **Synchronic Matrix** (the green shaded area in the graphic above - vertical columns 5-17). Find the Kin number. Write down the vectors. Then find the number overlays on the time matrix and space matrix. This is your third set of three numbers. Add them up. The sum of these three numbers is the **TFI for the Synchronic Matrix.** Also take note of the BMU in this vector.

7

4. Master Coordinating Frequency

Now add the three **TFI's** to find the overall **Master Coordinating Frequency Number**. Study this number and all of its factors. You can convert this number into a BMU by subtracting 441 until you arrive at a number 441 or less - this will locate your Master Coordinating Frequency in the Base Matrix. (You can also find the **kin equivalent** of this number by subtracting 260 until you arrive at a number 260 or less.)

5. Cumulative Harmonic Frequency

For your daily Synchronotron practice, the Cumulative Harmonic Frequency can be found by adding the sums of the Master Coordinating Frequencies for a seven-day cycle (week). You begin on Dali and finish accumulating on Silio. Then start over on the following Dali. You can also convert the Cumulative Harmonic Frequency into a BMU by subtracting 441 until you arrive at a number 441 or less. (You can also find the **kin equivalent** of this number by subtracting 260 until you arrive at a number 260 or less.)

6. Daily Diatonic Scale Notes

Based on the coordinates for each day we can also find a unique set of notes in the Diatonic scale. The music notes are a cycle of 8: Do - Re - Mi - Fa - Sol - La - Ti - Do'. Any multiple of 8 is Do' (high Do') of an octave. This means that any Base Matrix Unit can be converted to one of these 8 notes. Just count forward (Do, Re, Mi...) from the nearest multiple of 8.

Below are some samples to practice:

- 16 = Do' (16 = 8 x 2)
- 273 = Do (273 = 34 x 8 + 1)
- 179 = Mi (179 = 22 x 8 + 3)
- 207 = Ti (207 = 25 x 8 + 7)
- 2 = Re
- 181 = Sol (181 = 22 x 8 + 5)
- 414 = La (414 = 51 x 8 + 6)

Tip: If you circle or color in all of the multiples of eight in your 441 Base Matrix, then you can simply count forward from that point to find the note for the number you seek!

7. Holomind Perceiver

This is the advanced practice after you have mastered the above. The Holomind Perceiver Matrix (as seen on page 283 of the *Star Traveler's 13 Moon Almanac of Synchronicity*) is the map of the "nanochip" or new sense organ to be telepathically inscribed in the corpus callosum. Use your Base Matrix Unit coordinates to locate the daily points of activation on the Holomind Perceiver. You can learn more about the Holomind Perceiver in Chapter 11 of *Book of the Cube, Cosmic History Chronicles Volume VII.*
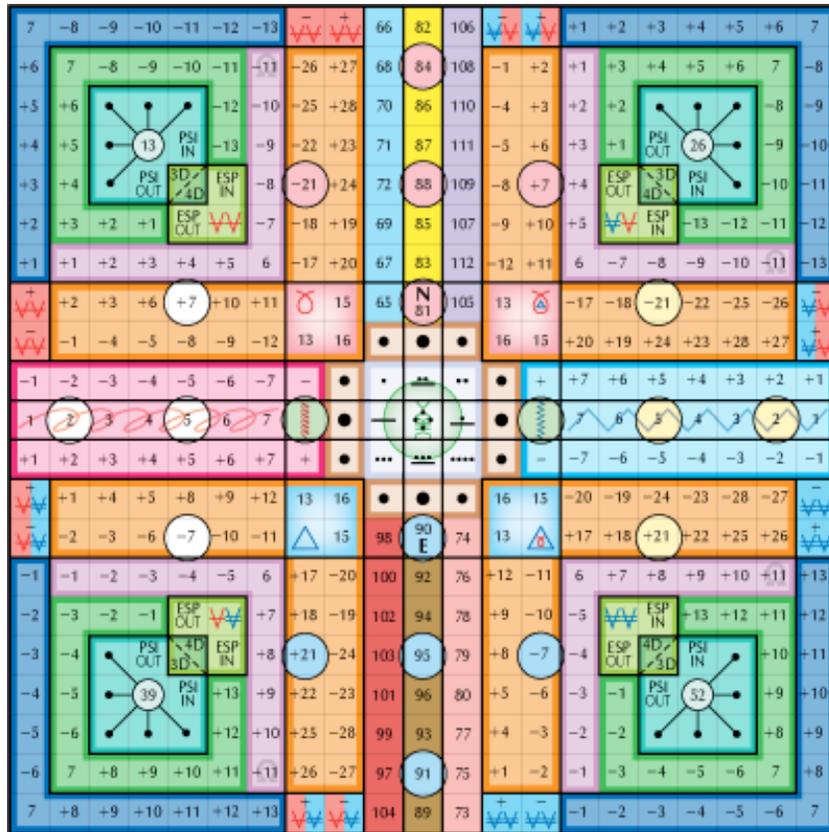

Heptad Gate
Crystal Moon 9 is Seli - Heptad Gate 2: BMU 291
Diatonic Note: 291 = 36 x 8 + 3 = "Mi"

Time Matrix Frequency
To find the TFI for Crystal Moon 9, Kin 5. First we note that Crystal is the 12th moon of the 13 Moon calendar, so we write it 12.9. Now we locate the calendar date, 12.9, in the Time Matrix. Write down its vector points: V.6, H.16. It is number 86; this is the 13 Moon calendar time matrix frequency.

Locate V.6, H.16 on the Space Matrix = 182
Locate V.6, H.16 on the Synchronic Matrix = 35
86 + 182 + 35 = 303
303 is the Time Matrix Telepathic Frequency Index (TFI) number
Also locate V.6, H.16 on the Base Matrix = 351, this is the BMU for the Time Matrix vector.
Diatonic Note: 351 = 43 x 8 + 7 = "Ti"

Space Matrix Frequency
To find the Space Matrix frequency, we find the day's kin number (kin 5) on the Space Matrix.
Kin 5 on the Space Matrix is located at V.7, H.4
Locate V.7, H.4 on the Time Matrix = 4
Locate V.7, H.4 on the Synchronic Matrix = 44
5 + 4 + 44 = 53
53 is the Space Matrix Telepathic Frequency Index (TFI) number

9

Also locate V.7, H.4 on the Base Matrix = 242 = the BMU for the Space Matrix vector.
Diatonic Note: 242 = 30 x 8 +1 = "Do"

Synchronic Matrix Frequency
Now we find the day's kin number (kin 5) on the Synchronic Matrix.
Kin 5 on the Synchronic Matrix is located at V.5, H.5
Locate V.5, H.5 on the Time Matrix = 28
Locate V.5, H.5 on the Space Matrix = 10
5 + 28 + 10 = 43
43 is the Synchronic Matrix TFI number.
Also locate V.5, H.5 on the Base Matrix = 297 = the BMU for the Synchronic Matrix vector.
Diatonic Note: 297 = 37 x 8 +1 = "Do"

Master Coordinating Frequency Number
Now add the three TFI's from the three matrices: 303 + 53 + 43 = 399
Remember: The BMUs are not added when finding the Master Coordinating Frequency number.
So 399 is the Master Coordinating Frequency number of the day
Corresponds to **BMU 399**
Diatonic Note: 399 = 49 x 8 + 7 = "Ti"
Reduces to **Kin equivalent** 139: Blue Solar Storm

Diatonic Musical Notes
The notes in this example are: "Mi - Ti - Do - Do - Ti"

Study the numbers. Are they prime? What are their factors? Look up the numbers in the 441 index in the 441 number dictionary in *Book of the Cube, CHC VII*. You can begin to build up your own personal associative number index based on your kin number and basic birth data and those of your friends, relatives, and significant dates.

To Summarize: Each day we locate the following:

    1. Heptad Gate

    2. Time, Space and Synchronic matrix TFI numbers. Each has a
        a. V. H. Vector
        b. Base Matrix Unit (BMU)
        c. Space, Time and Synchronic numbers
        d. TFI numbers for each of 3 matrices

    3. Master Coordinating Frequency (sum of all three TFIs). Can be converted to a BMU and Kin equivalent.

    4. Cumulative Harmonic Frequency (sum of Master Coordinating Frequencies for previous days of the week). Can also be converted into a BMU and Kin equivalent.

    5. Diatonic Scale Music Notes for the BMUs we find.
