

Galactic Spiral Density Wave & 2012

TIME MAP 1

HUNAB KU

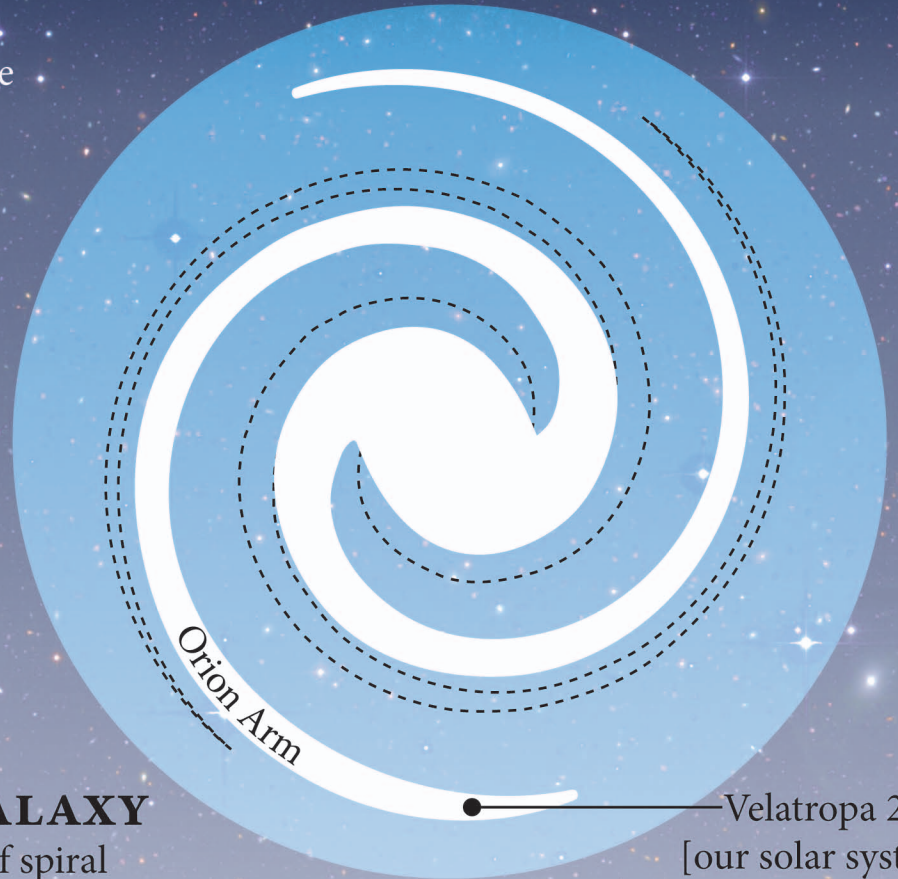

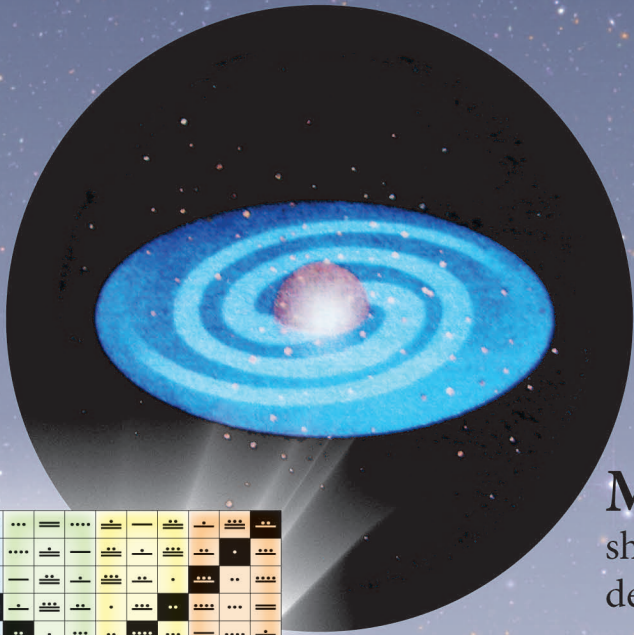

“One Giver of Movement and Measure”

Template of galactic structure as form and motion.

Form = spiral arms

Motion = galactic spiral density wave

This is a self generating wave pulsed from center of galaxy and is in continuous pulsation. It forms the spiral arms.

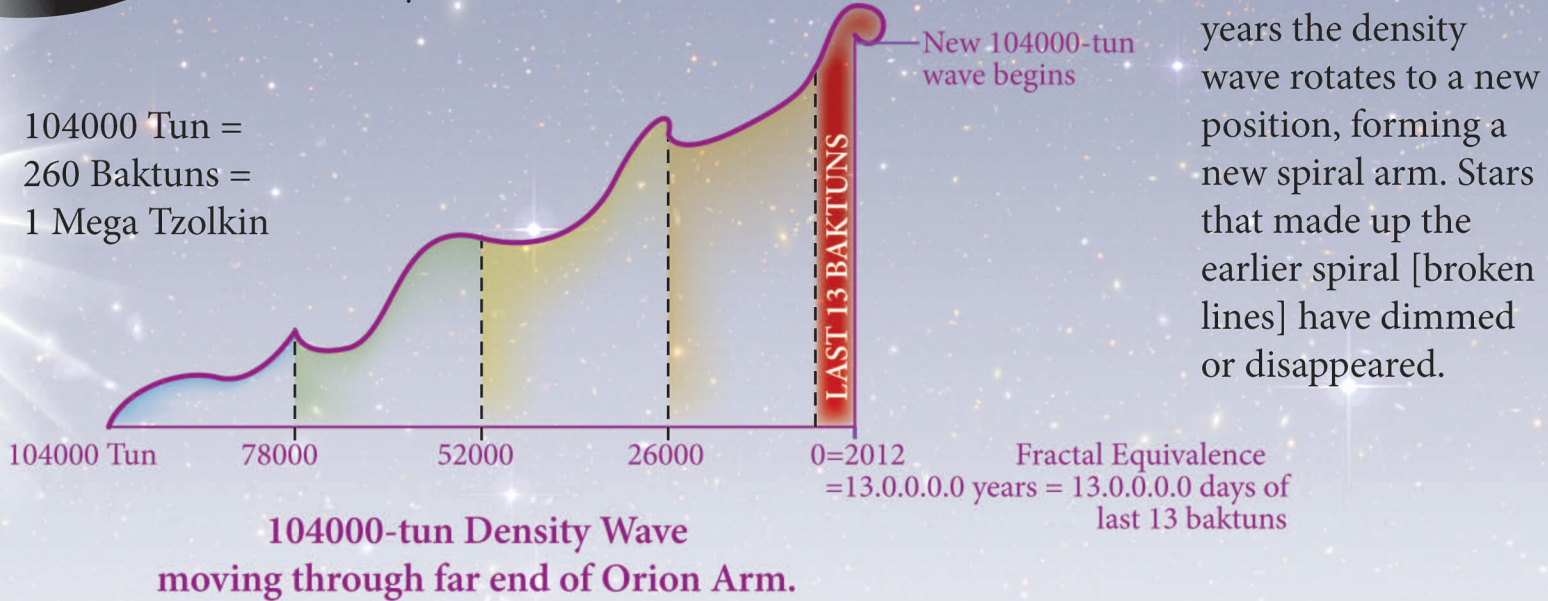

MODEL GALAXY

showing effects of spiral density wave

104000 Tun =
260 Baktuns =
1 Mega Tzolkin

Over millions of years the density wave rotates to a new position, forming a new spiral arm. Stars that made up the earlier spiral [broken lines] have dimmed or disappeared.

The 7 cycles build up as ever greater density zones of solar planetary excitation. It is the purpose of consciousness to ride and even be in advance of the wave, spontaneously generating a galactic intervention to conclude the biosphere-noosphere transition.
