### **Sun, 7 Solar Angels and DNA**

"You must cultivate and develop the inward form. For that is what can withstand the presence of God. To do that one must continue to function above and beyond the call of human duty." – Valum Votan

"Within this Earth we know there is another Earth. It knows us, though we know it not." – Valum Votan

Application of the codes of the Synchronotron and synchronic order help us to evolve our consciousness by calling forth a New Mind, also known as (re)constructing the Temple of the Ark. This is not a human activity but the enactment of a divine mechanism. Our present essence is like a channel that has been covered over. These codes help us uncover this channel so that the original commands embodied by the *primal essence* may once again flow unimpeded to the *present essence* as it was originally intended.

Our primal essence was embodied elsewhere, well before "the world as we know it", and was coded with the instructions for the (re)construction of the Temple of the Ark. This is the Divine Blueprint for the design of reality to occur after the collective karmic field has finally been cleared. This Blueprint is unfolding independent of perceived reality. Our duty is to follow the coded signs.

Tuning into the daily coded messages sharpens our antennae creating an interdimensional bridge for star communication. The intrinsic order of this perception becomes eventually becomes inseparable from our own process of perception.

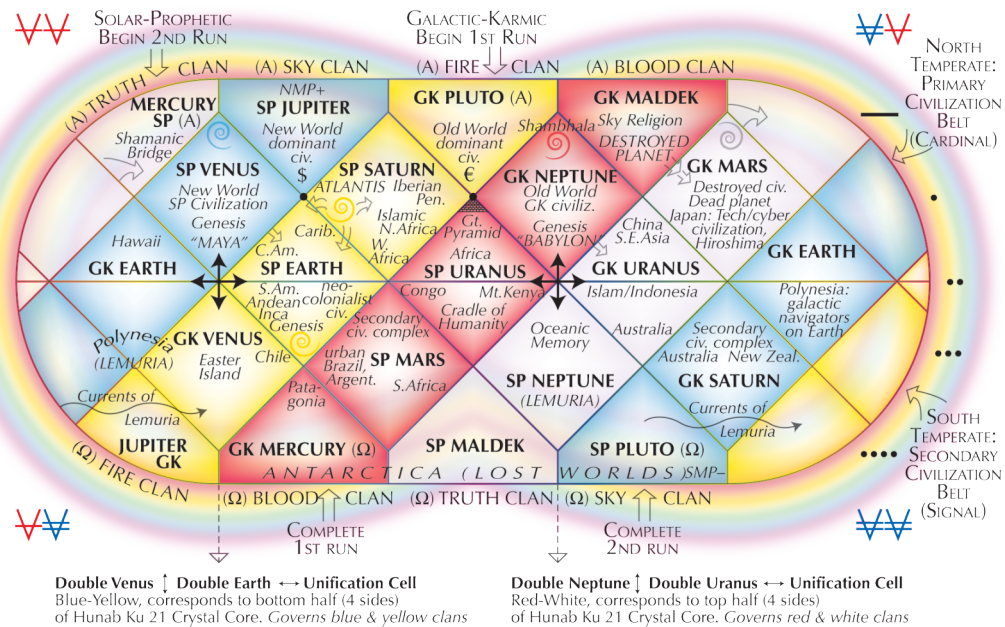

"...Apart from this there are billions of stellar sounds which have telepathic communications with you. Your planet has neither found nor heard the essence of these sounds. Your sixth senses are antennae which can receive these sounds, even if very little.

...Real appearances on your planet is nothing but a medium of vision which introduces you to yourselves .. Everything is a deception, a consolation you see but you cannot hold yourselves in the mirror. The moment you hold your being you attain the consciousness of your being."  
– Mevlana, *The Knowledge Book*, p. 254

The method and system of the Cube, of which the Holomind Perceiver is the medium for comprehension, is to make apprehensible a spectrum (or fractal of the infinite) of the "billions of stellar sounds which have telepathic communication with you." This is primarily accomplished through the method and language of number as a unique dimension of reality. The numbers constitute their own universal matrix. The purpose is ascribed in accord with your current stage of evolvement. This system is Living, and not bound by the order of appearance, but a whole other level of perception that is vastly subliminal and fully telepathic (from the human point of view).

## Transmission and 7 Solar Witnesses

Around our planet is the Planet Holon, a holographically projected protectorate zone. Radion is the fourth-dimensional electrical fluid that connects the planetary flows. The purpose of the Planet Holon is to carry transmission signals or energy streams (radion) that holographically coordinate the intelligence of any galaxy including planets. The 441 cube matrix is a key that we can apply daily to awaken our dormant DNA and accelerate this process of knowledge.

Our Sun, Kinich Ahau, is a lens focusing light into a beam or prism, breaking light down into spectral rays or images. These beams of information are then transmitted to the planetary orbits. Our planet receives these new beams at the noosphere receptacle – the Marka (North) Pole. The Marka Pole is governed by the Dragon – the Primal Force – and controls the power of cosmic being, which descends to our planet as Cosmic Knowledge.

As of Galactic Synchronization there has been an increase in the spectrum of light reaching our planet, which in turn uproots the unresolved karmic frequencies. This means that extra exertion is required on our part to move through the karmic inertia.

The next 7 years is known as the *Cycle of Sirian Surveillance of the New Earth*

(2013-2020), and is overseen by a key solar angel serving as a witness from the central Sun. The seven solar angels/witnesses coincide with the Book of the Seven Lost Generations, the key which is found in the Chilam Balam, and particularly the prophecy of Antonio Martinez, AD 1692, 1000 years after the dedication of Pacal Votan's tomb (see [7:7::7:7 Telektonon Revelation](#)).

The resurrection of the 7 solar angels coincides with the flip of the Sun's polarity on Kin 60: Yellow Galactic Sun, Rhythmic Moon Gamma 17 (29 Dec 2013). The sunspots can be understood as the actual thinking activity of the Sun. Solar Cycle 24 began in 1989, the same year as the discovery of the Law of Time.  $19 + 89 = 108$ . It completed itself in 2013 as guided by the return of the first solar angel. The solar angels are calling on us to identify with the structural resonance of the planet as a whole system.

Also note that on December 21, 2012, Kin 207 a black cube was photographed in the Sun and then again on Electric Moon 2: Red Cosmic Dragon (September 21, 2013).

Note that the seven solar witnesses who oversaw the 7 lost generations were retrieved in the Seven Years of Prophecy (1993-2000) and recapitulated as the sequence of Telektonon Prophecy: Mystery of the Stone (2004-2011). We see these 7 recapitulated in the kin equivalents of the next 7 years (2014-2020).

2014 Kin eq. 194: White Crystal Wizard: First Lost Generation (BMU 250)  
2015 Kin eq. 195, Blue Cosmic Eagle: Second Lost Generation (BMU 251)  
2016 Kin eq. 196, Yellow Magnetic Warrior: Third Lost Generation (BMU 252)  
2017 Kin eq. 197, Red Lunar Earth: Fourth Lost Generation (BMU 253)  
2018 Kin eq. 198, White Electric Mirror: Fifth Lost Generation (BMU 254)  
2019 Kin eq. 199, Blue Self Existing Storm Sixth Lost Generation (BMU 255)  
2020 Kin eq. 200, Yellow Overtone Sun, Seventh Lost Generation (BMU 256)

Note that this concludes with the Sun: Commanding power of Life and Enlightenment. The lineage of Votan is the lineage of Solar Consciousness. The Sun is life. The Law of Time tells us that life itself is the function of a program code originating in the radial matrix of 4th/5th dimensional time. (see postulate 4.7 of the Dynamics of Time). All of life is involved in the transformation of solar energy (light ascending in ever lighter gradations).

We are meant to evolve into higher solar consciousness. In the Essene Gospel of Peace, Jesus tells us that the laws of the Son of Man are seven; the laws of the angels are three; and the law of God is One. These key numbers 7 and 3 define the 441 cube matrix, the final revelation of the Telektonon prophecy of Pacal Votan.  $3 \times 7 = 21$ .  $21 \times 21 = 441$ .

*Telektonon is no word at aall, but number multiplying itself from within  
God's unending meditation which we choose to call creation. –Valum  
Votan/Telektonon Prophecy of Pacal Votan*

*The sunstone is identical with Christ, who was that stone.* – quote from HPB Secret Doctrine by Cevaliear Prach, a great Hebraist commenting on the Zohar.

The sun stone or "solar disk" controls light threshold spectrums which convert Light into different lifeforms. These are the symbols that were said to be given to the Elohim during the creation phases. Each stone is attended to by 3 master initiates. Triangular consciousness bridges so that the new programs issued by the 7 solar angels can be implemented on each. So we see the importance of the 7 and the 3.

## DNA and Sunspots

*"Synchronization of the interplanetary flux tube system AD 2013, marks the advent of the solar consciousness, the stabilization of the superconscious hyperorganic evolution of the terrestrial planet art spore within the whole heliocosm."* – Valum Votan, Dynamics of Time, Postulate 14.2

Within the 441 cube matrix the Earth circuit (3) contains 64 units which are directly wired into the five senses. With the sunspots our sensory experiences have the opportunity to be catalyzed into telepathic attunement, according to our awareness.

441 Base Matrix – Earth Circuit (3)

According to Cosmic Science, DNA is a 64-unit biopsychic solar life code inclusive of cosmic metabolic codes. The solar flip that concluded the 23-24 year binary sunspot was a single thoughtform that contained the synthesis of the cycle that proceeded it (see [Mystery of the Stone](#)). Everything is synchronically timed. The sunspots are ejected to the surface of the Sun by a system of energy vortexes which are called “flux tubes.” These are also found on the poles of the planets, in the magnetosphere, going down into the poles; each planet has flux tubes.

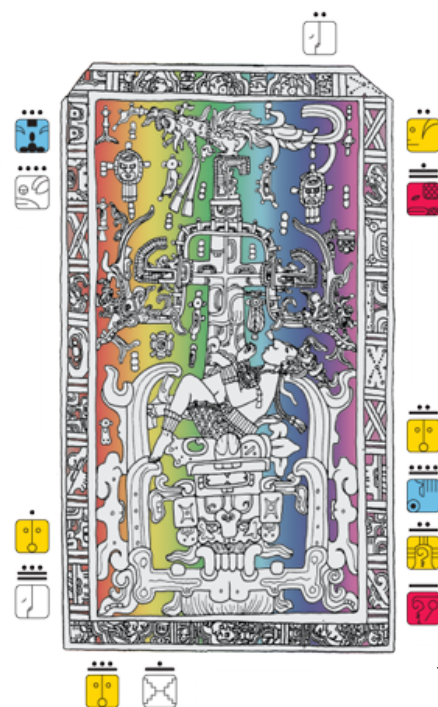

In the Quran sura 91 is "Sun". 91 is the noospheric constant. Sura 24 is "Light" with 64 verses, DNA code. The Sun or "light of God" is described in Sura 24:35.  $2435 (5 \times 487) = \text{BMU } 230$ , psi input of Cosmic Ascension.  $230 = 23 \times 10$ , frequency of manifestation of a solar sunspot cycle.

"God is the Light of the Heavens and Earth. The allegory of His Light is that of a concave mirror behind a lamp that is placed inside a glass container. The glass container is like a bright pearl-like star. The fuel is supplied from a blessed oil producing tree that is neither eastern nor western. Its oil is almost self-radiating; needs no fire to ignite it. Light upon light. God guides to His Light whoever wills (to be guided). God thus sites the parables for the people. God is fully aware of all things." – Qur'an, 24:25

Keep in mind that the structure of DNA and all elements first exist as mental geometries that are projected from higher mind. These structures appear in 3D as organizing factors of atoms and molecules that create different chemical elements and structures that create the world of matter. Other lifeforms have other systems of DNA that are all mathematical at their root.

With the changes in the Sun, the life codes of our DNA are now in a stage of regeneration governed by 7 solar angels who dwell within the Sun. On the tomb lid of Pacal Votan there are 13 clear signs, three of them are Suns: one on the Eastern side (7 Sun, Kin 20); one on the Western side (Magnetic Sun, Kin 40); and one in the Southern point (Galactic Sun, Kin 60). The three of these kin add up to 120. 120 is Yellow Electric Sun or 3 Sun. Kinich Ahau, Alcyone and Sirius.

The Sun, Kinich Ahau, was also said to possess three separate bodies. According to some mystics there are three suns in each solar system sometimes known as the three lights: the spiritual sun (5D body), the

intellectual (or solar) sun (4D body), and the material sun (3D body).

Alpha Centauri, the closest star system in the galaxy to our solar system, is a trinary star system consisting of 2 sun-like stars and a red dwarf. A triple star system in the constellation Cygnus consisting of two reasonably Sun-like stars (both yellow dwarfs) and a red dwarf.

*Because you have become an embodiment of the inscrutable mystery, you may receive the knowledge and power of the Solar Logos. You are now a transcendental exemplar - child of the Sun, a member of the future race, a golden one. – Valum Votan*

### **Pacal Votan's Samadhi**

**Notes from the Cube by VALUM VOTAN [see also *Cosmic History Chronicles*]**

Having experienced the life generating nature and function of the orbital frequencies and their ratio interval frequencies, incorporating them into his mental make-up as co-creative knowledge and capacities for cosmic creation according to the Law of Time, the law of the octave and the 441 11th dimensional/18th dimensional system of the cosmic cube matrix, including specific synchronic details of the prophecy he was to leave for the closing of the cycle, Pacal Votan was ready for the next stage. To summarize: "He first experienced a "lost world" recovery samadhi of 78,000 years. This is a fractal of 78 [6 x 13] a key to be deciphered in his tomb... fractal of 780, the Martian synodic cycle. [Also 7800-year monkey genesis - the lost time: -10987 to -3187 Dreamspell count]

"During the 78000-year samadhi" all the lost world knowledge "was imprinted into the Earth's core, particularly as it had been synthesized on Mars" [= Bode 16, cumulative 37 x 5 = Kin 185 (5 x 37) 3 Serpent Maldek activator to be resuscitated 1st year of prophecy 1994 - Kin 194]

Then in the final 26000-year cycle, PV focused specifically on the Earth's orbit... at this time he obtained the necessary comprehension of all the aspects and functions of knowing within the Velatropa system and heliocosm, inclusive of construction, destruction and reconstruction." ([\*CHC Volume II\*](#), p. 114).

Then: "Thru his power and mental concentration PV was able to identify his consciousness as the primal cubic parton - indestructible form construct or primary building block of reality ... magnetizing all resonances and vibrations of the disconnection between the 3rd and 4th dimensions in V.24.3 system."

In the 441 cube matrix the primal cubic parton becomes the 8th circuit, the outer perimeter of the 9th time dimension, the inner core time of the primal creation codes, and the foundation matrix of the 7th mental sphere, the holomind perceiver. This primal cubic parton 8th circuit, he imprinted telepathically as the perimeter around his crown chakra, and thence extended it to assume the form of his crystal time travel vehicle.
