

CHAPTER 4

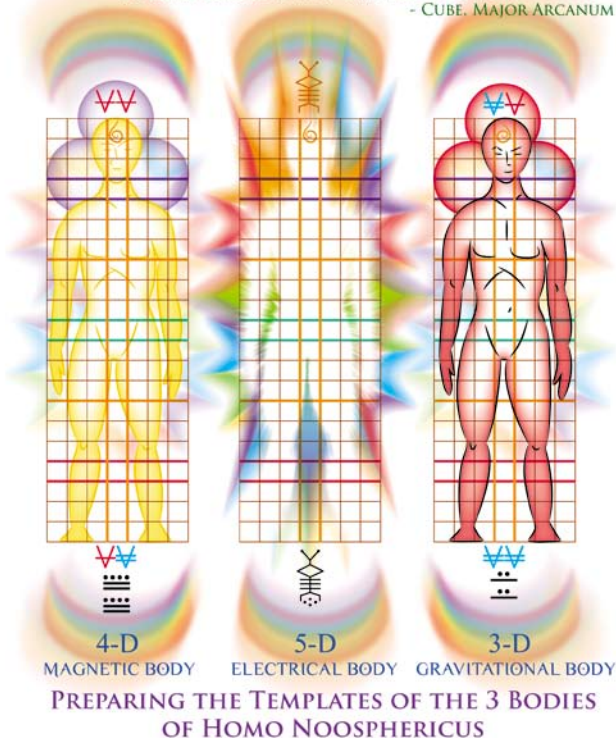

TOWARD THE FIFTH DIMENSION ACTIVATING THE THREE BODIES WITHIN THE CUBE MATRIX

The human is meant to evolve into a holonomic energy capacitor and activator, working as a vital component in the whole system of the planet.

—CHC, Vol. II

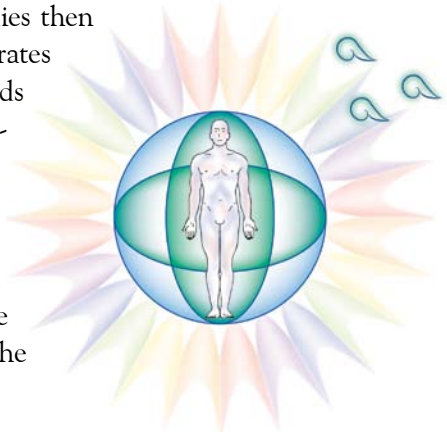

1. Human consciousness is evolving toward the fifth-dimensional entity; this is the purpose and function of the cultivation of mind. The mind first localizes itself in the third dimension, and in the fourth dimension extends into states of continuing consciousness. Here, mind becomes engaged in creative meditation and superconscious functions that are composed of the third, fourth and fifth dimensions.
2. Through yoga and meditation we can bring the third-dimensional body into alignment with the fourth- and fifth-dimensional bodies. This is the function of Synchrongalactic yoga (CHC Vol. VI) and all of the practices of the Law of Time.
3. All three bodies can be systematically activated within the living system of the 441 cube matrix, which is a function of the Law of Seven and the Law of Three ($7 \times 3 = 21$); ($21^2 = 441$). The Law of Seven refers to the codes of creation that can be accessed through the seven chakras. The Law of Three is the law of evolutionary unfoldment that integrates the three bodies: third-dimensional physical body (body of the temple), etheric fourth-dimensional body (body of destiny), and fifth-dimensional electronic rainbow body (body of radiance).

"THE CUBE IS THE KNOWLEDGE THAT UNIFIES, SYNTHESIZES, HARMONIZES AND SYNCHRONIZES DIVINE WISDOM SO THE SOUL IS CUBED IN ITS OWN PERFECTION"
- CUBE, MAJOR ARCANUM

4. When we practice aligning and integrating our three bodies then we function as a triadic organism. Cosmic Science illustrates how the human is composed of types of electromagnetic fields with a gravitational foundation with high biopsychic potentiality. The fourth-dimensional self is the spiritual/mental organizer. The third-dimensional self is the evolutionary vehicle of transformation. However, when the third-dimensional self resides exclusively in the unconscious, it merely identifies with the body and sensory experience. This is the self that we are seeking to transcend (the self that repeats the same stories and programs over and over).

5. Discipline is essential to change. Regular practice and study help us engrave new patterns that when repeated on a daily basis over time changes our behavioral and mental patterns. This liberates the fourth-dimensional self to organize according to selfless universal principles of spiritual/mental order.
6. Through consistent discipline and practice, the higher self descends as the lower self transcends. The third-dimensional chatter becomes subsumed in the mantle of the higher or fifth-dimensional self. The number of realized fifth-dimensional selves is relatively limited on this planet; though there may be 7 billion human entities, there are not 7 billion fifth-dimensional selves.
7. The fifth-dimensional self is the director of the fourth-dimensional etheric body that governs the third-dimensional performer; it waits patiently for the moment of self-transcendence. Self-transcendence is the main function and opportunity of studying and applying the teachings of Cosmic History, inclusive of the 441 cube matrix.
8. The Law of Time refers to the etheric fourth-dimensional being as a *holon*. The purpose of the holon is to allow the soul maneuverability or elasticity between shifting dimensions. The fifth-dimensional entity is purely electronic and does not give origin to a perishable biological entity. In other words, the fifth-dimensional entity is the eternal part of yourself that existed before birth and continues after death—your immortal body. As an angelic entity, the fifth-dimensional self cannot deviate from Divine Will.
9. These three dimensional entities communicate to each other through the mind, namely through the six plus one mental spheres (see *CHC, Vol. VI*). The six + 1 mental spheres of consciousness are etherically congruent with the brain and serve as the computer or hardware of the mind. Each mental sphere has a different function in the thinking layer of the cosmos. Thinking layers are strata in the ocean of consciousness that interpenetrate the different dimensions.
