## White Lunar Wizard Meets Black Iron Garuda Crest, Cubing the Challenge

**Note to the Reader:** Much of the information contained herein is unavoidably mathematical or numerological in nature. Please be patient with yourself. The Galactic Masters are informing us that number is the language of telepathy, and that the 441 matrix is the grammar and vocabulary of this language. The synchronic order is embedded in and is a function of this matrix as well. Thank you. May your efforts be blessed!

### 1. Year of the Cube—A Pacal Votan Clear Sign

“The information given to you is the Mirror of Truth. Those who gaze into that Mirror, those who are awakened by this consciousness are obliged to serve directly the Dimension of the Unified Reality.”

— postulate 13 of 78, “Transmission from the Cosmos Federal Assembly.” P. 386, The Knowledge Book

On the morning of Magnetic Moon 7 (August 1, 2007), first day of the Magnetic Moon Cube Journey, White Lunar Wizard year, at Sugar Hill, Upper Upham, Wiltshire, UK, a crop circle left a most notable impression. As that day was also Kin 60, galactic signature and clear sign of Pacal Votan, there is no question that it was a “clear sign” of inter-dimensional communication—a cubed telepathic message from the White Lunar Wizard himself.

(Note: On the Long Count that day it was Kin 11, 11 Monkey)

In this profoundly geometrical impression there are 18 cubes so arranged as to form a larger cube with a six-pointed star in the center. There are 3 faces showing to each of these cubes:  $3 \times 18 = 54$ , kin number of the White Lunar Wizard year—sign that this year is the “year of the cube.”

Around the 18 cubes are four rings. This year is the fourth Ring of the Mystery of the Stone. Each ring has 36 triangles.  $36 \times 4 = 144$ ,

number of the temple, and of the “elect,” while  $54 \times 4 = 216$ , or six cubed ( $6 \times 6 \times 6$ ). Each of the 144 triangles has three vertices— $144 \times 3 = 432 = 54 \times 8$ ,  $108 \times 4$ ,  $216 \times 2$ ,  $9 \times 48$ , and  $27 \times 16$ . While 27 is the third power of nine, and the special power of Black Iron Garuda Crest, the fourth Bolontiku, sixteen is the number of the Cube Journey. The 18 cubes comprising the single larger cube are a sign of the 144,000 to be cubed within the Inner Heptagonon of Mind by the closing of the cycle, 21/12, 2012, five years hence.

This crop circle is a demonstration that the power of the new time of the galactic Dreamspell is confirmed and supported by the higher dimensional wizards awaiting the awakening of humanity to its next evolutionary stage of cosmic consciousness. Through the Dreamspell, the frequency of the Law of Time—T(E) = Art—is applied synchronically, in this case resulting in the telepathy of the cube crop circle.

54 is the sum factor of  $9 \times 6$ . According to the Cosmic Science 6 miriads create the primal electrical charge (solen), while 9 miriads create the primal negative charge (kemio). The combination of the +6 and -9 results in a new mertanica vidica line. A mertanica vidica is the line of force that imprints any new life formation at its conception. The sum factor of the frequency of conception is then 54 ( $9 \times 6$ ). The imprinting in this case is the crop circle in question. The new life germinating in the Lunar Wizard year is the stirring of the new evolutionary type to emerge in 2012-2013 from within the cube of the Inner Heptagonon of Mind.

This sign occurred on the cubing of the first heptad of the fourth ring of the Mystery of the Stone, which, in the 20 Tablets of the Law of Time, marks the beginning of the Monkey genesis. In the 20 Tablets, the kin 54 year occurs in Cube 11. The system of the cube comes from the 11<sup>th</sup> dimension, the first of the supremely higher dimensions leading up to the 18<sup>th</sup>.  $54 = 18 \times 3$ , while 54 (the number of faces on the 18 cubes) + 144 the number of triangles in the four rings =  $198 = 11 \times 18$ .

Finally, look at this. The Kin 54 year spans the Arcturus Dominion (AD) years 2007-2008. Add these together:  $2007 + 2008 = 4015 = 73 \times 55$ , or  $11 \times 365$ . In this is a sign that in the 11<sup>th</sup> year, 2011, of the third millennium, Camelot shall return. This is what is augured following the conclusion of the Mystery of the Stone, marking the beginning of the 6 Wizard year, the last and final Wizard Ring before the closing of the cycle.

“Monkey Genesis anchors magic of the Lunar Earth Wizards.”

The catalytic journey has begun. This new evolutionary type catalyzed by this magic, homo noosphericus, can only come about by an act of noogenesis—birth by mind. But this cannot be just any mind. What mind is there among you that can travel “to buddhalands while dwelling in non-substantiality?” To become one of those cubed within, you must develop such a mind. You must enter the profound Samadhi that becomes the meaning of the cube. You must practice like a single-minded

wizard or one-pointed yogi until you can make the lion lie down with the lamb, while beating swords back into plowshares. Then, perhaps, through your third eye, you, too, will be able to project a crop circle.

## 2. Cubing the Years—Understanding the Dimensional Shift

“Numbers are the highest degree of knowledge. It is knowledge itself.”

—Plato

“O children of the day of truth, before the separation which divided you into the children of the dawn and the children of the book, there was only the cube of the law and the law of the cube.

“Everyone and everything moved and lived within this Law: one mind, one spirit, one will.

“ Within the dimensions and measurements of the cube are all knowledge of heaven and earth ...”

—Telektonon of Pacal Votan, Sec. III, vv. 11-13, “The Cube of the Law and the Tower of Babel”

“Time is running down,” you hear it said, or, just as often, “We are running out of time.” What time is running down? What time is running out? We mean here the time of the third-dimensional 12:60 mind. We can all feel it. It is like being inside a pressure cooker where the water is just about to boil. Only in this case the pressure cooker is a cube, and the water is the unconscious ferment of history. The end result is the *dimensional shift*.

With the passage into the Ring of the White Lunar Wizard, 26 July 2007, the world slipped imperceptibly into the incipient stages of the dimensional shift to be climaxed between Rhythmic Moon 9, Blue Resonant Storm year (2012) and 26 July 2013, Kin 164, first day of the Ring of the Yellow Galactic Seed. Between the beginning of the Kin 54 year, AD 2007, and the galactic synchronization, 2013, are exactly six Rings—the number of years encompassing the dimensional shift is the same number as there are sides to a cube: six. This, as we shall see, is a sign that the dimensional shift describes the process of an exponentially diminishing timespace cube.

From the perspective of the system of the cube, timespace *is* a cube. Third-dimensional mind thinks that “time keeps on slipping, slipping, slipping into the future.” But this time that is slipping is only the linear perception of time. In the near future we will experience the convergence of many “time lines”—the dimensional shift. From the higher, fourth-dimensional perspective, time and space are

an inseparable unity that together create a cube. The three dimensions of space—height, width and depth—are bound by the invisible cube of time, which is the fourth dimension.

As long as the life and its attendant cosmological processes are functioning according to the normative values of the law of time and its synchronizing frequency, 13:20, then the timespace cube remains relatively constant. To the perceptions of those multidimensional beings dwelling within the vast timespace cube of cosmic reality, the dimensions of that cube are without bound. This is because no matter where you go, you are always at the center of that vast cube. Such is the nature of the intrinsic cosmocentric perspective of cosmic consciousness.

However, when there is a deviation from the harmony of living in accord with the universal values of the frequency of synchronization, then the distorted perceptions begin to affect the timespace cube. When the distorted perceptions are due to the limiting affects of living solely according to third-dimensional beliefs and 12:60 time conceptualizations, then life exceeds all bounds, expanding convulsively at phenomenal rates of speed toward the edges of its own timespace cube.

There comes a moment of exponential acceleration when the timespace cube itself becomes distorted and limited by the ignorant perceptions. Yes, there comes a moment when it appears that the timespace cube begins to diminish, to shrink, finally imploding upon the deviant mind that brought about the distortion in the first place, resulting at last in a dimensional shift.

That moment of the diminishing cube arrived on the dawn of the White Lunar Wizard when an imperceptible implosion of accelerating indices of psychomental phenomena reached the limit of their timespace cube. The ratio proportion of six years cubed =  $216(6 \times 6 \times 6)$ . Such a cube describes the timespace cube ratio when the limit for material expansion and consumption has been reached within the finite timespace of a single planetary biosphere. In particular, the cube proportion of 216 (6 to the third power) defines the point at which the timespace perception of the dominating mental field begins to implode in a series of successively diminishing cubes—all contained within the master 216 cube.

Each diminishing cube encompasses a single rotation of the Earth around the sun, such that the second year cube diminishes to a proportion of five to the third power or  $5 \times 5 \times 5 =$  ratio proportion 125; the third year to a cube of four to the third power,  $4 \times 4 \times 4 =$  ratio proportion 64, the fourth year to a cube of three to the third power,  $3 \times 3 \times 3 =$  ratio proportion 27; the fifth year to a cube  $2 \times 2 \times 2 =$  ratio proportion 8, and the sixth and final year,  $1 \times 1 \times 1 = 1 =$  ratio proportion 1 = maximum implosion (2012). This means that 2013 = 0, or dimensional shift, lift-off attained. In this way the final six years of the closing of the cycle are each cubed within a master cube.

The diminishing sequence of timespace cubes is the result of the following formulation: once limit of timespace cube has been reached through acceleration of internal causative factors, then increasing speed of mental ratios decreases size of cube.

Mental ratios are here defined as functions of consciousness in relation to the timespace in which they are given to operate *and* as they are qualified by two other complex factors: 1) concurrent increases of quantity of information and acceleration of information processing; and 2) quantity and expansion of physical plants and hardware plus equivalent energy consumption needed to drive all the social mechanisms necessary to sustain the global information processing system, inclusive of all other adjunct systems needed to provide socio-mechanical support, maintenance and service, i.e. transport, commodity production and consumption, and urban consumption transformation zones.

Hence we arrive at a more precise formulation defining the collapsing cube ratios: accelerating gigabytes of information bits multiplied by increase in quantity and speed of machines, factored by expanding quantity of energy needed to maintain this process, multiplied by (in)capacity of mental ratios to accommodate the exponential feedback rates, divided by the amount of physical times space available on a planetary scale to sustain the entire complex = mental ratios attaining speed of infinity minus one, establishing annual sequence of exponentially diminishing timespace cube ratios.

“63. The Universal laws and programs prepared centuries ago had been prepared in accordance with time units of the world. At the moment, time has gained speed. Dates are approaching.

“64. The scarcity of time is mentioned as a result of the time period which will be accelerated even more.

“65. You are faced with a change of Age. Do not ever forget this. Everything will settle in its course, silently and profoundly.”

—The Knowledge Book, postulates from the Cosmos Federal Assembly, p. 389

To summarize: Timespace is a cube. Once exponential limit is reached (infinity minus one) increase of speed of mental ratios decreases size of cube.

The six years 2007-2013 (all years 26 July through 25 July) establish six timespace cubes, one within the other of proportionately decreasing size in a diminishing scale of values:

$$6:5:4:3:2:1:0 \quad (6+5+4+3+2+1 = 21)$$

Annual Scale:

$$2007 - 2008 - 2009 - 2010 - 2011 - 2012 - 2013 = 0$$

$$6^3 \quad 5^3 \quad 4^3 \quad 3^3 \quad 2^3 \quad 1^3 = 21^2$$

$$216 + 125 + 64 + 27 + 8 + 1 = 441 \quad \text{Original Matrix}$$

Notice how the cubes of the numbers 1-6 = 21 squared, while the sum of all six frequencies = 441. Then notice how the cumulative frequencies of the first four years = 432, or  $216 \times 2$ . ( $216 + 125 + 64 + 27 = 432$ , or  $144 \times 3$ ,  $54 \times 8$ ,  $27 \times 16$ , etc.)

These four cube frequencies represent the last four years of the Mystery of the Stone. This indicates that by 2011 the 144,000 must be ready for being cubed within the Inner Heptagon of Mind.

The final two cube years are the entry into inner time. The fifth year (2011-2012) is the  $2^3$  cube of 8 ( $432 + 8 = 440$  cumulative sum), attaining the liberation of the galactic harmonic and the last year, 2012-2013 is the Inner Heptagonon Cube of Mind, the  $1^3$  cube of 1 which establishes the original matrix, 441 (cumulative sum  $440 + 1$ ) or 21 squared. (See: Rinri Project Newsletter, Volume III. 3. 3).

Also notice in the sequence 216 -125 -64 -27 -8 -1 -0 that there are six interval numbers:  $216 - 125 = 91$ ,  $125 - 64 = 61$ ,  $64 - 27 = 37$ ,  $27 - 8 = 19$ ,  $8 - 1 = 7$ ,  $1 - 0 = 1$

Now add those five interval numbers  $91+61+37+ 19+7+1 = 216$ , the number of the master all-enclosing cube of the Lunar Wizard year. This means that the master cube 216 will be maintained throughout the six year cycle, for it is the indestructible container cube. When the final cube of 1 is completed at 0, 2013, then the 216 cube will accommodate the inter-dimensional shift represented by the springing forth of the 441 Original Matrix and its cube of 21 cubed or 1.3.3.1. Also note the difference between  $441 - 21^2$ —and  $216 - 6^3$ —is 225 or  $15^2$ —while  $15 + 6 = 21$ .

Then add the cumulative sum frequencies:

$$216 + 125 = 341 \quad (11 \times 31)$$

$$341 + 64 = 405 \quad (81 \times 5)$$

$$405 + 27 = 432 \quad (144 \times 3, 54 \times 8, \text{ etc.})$$

$$432 + 8 = 440 \quad (11 \times 40)$$

$$440 + 1 = 441 \quad (21 \times 21, \text{ or } 7 \text{ squared} \times 9)$$

First four years sum frequency 432 ( $48 \times 9$ , or ratio 48:1)

Last two years sum frequency 9 ( $48 + 1 = 49 = 441 = 49 \times 9$ ). The 9 (8+1) frequency of the last two years represents the nine Stations of the Ark of the original creation. As the Inner Heptagonon of Mind,

this etheric structure will be evident to the purified ones and from it will be retrieved formulations for the second creation.

To summarize from yet another angle:

Each of the annual cubes represents the collective planetary timespace perception in relation to a) increasing acceleration of the speed of mental ratios multiplied by b) factors of increasing machine dependency. Machine dependency is a feedback function of increase in accelerating quantity and speed of machines, which in turn creates more machine dependency, ad infinitum, that is, until quantum dimensional shift reaches point of implosion and collapse.

Speed of mental ratios is defined as:  $f(\text{planet size divided by number of people multiplied by quantity and speed of machines})$ ; the resulting coefficient defines machine dependency.

Speed of mental ratios is further defined as a function of a self-perpetuating 12:60 machine timing loop: the greater the number of human beings, the greater the machine dependency, the greater the increase in the quantity and speed of the machine.

The result is an accelerating curve of the increase of the speed of mental ratios which finally crosses a critical threshold of infinity minus one. This is a factor that is quantitatively unattainable, so that when this threshold is passed, the effect is to decrease the size of the timespace cube in relation to the accelerating speed of the mental ratios. The consequence of this effect is subjectively felt as an increasing sensation of time speeding up accompanied by increases in violent conflict, emotional instability, stress, pressure, insanity, irrational behavior, social breakdown, terrorism and war compounded by unforeseen effects of “climate change.”

Anticipate that by the seventh year of the Mystery of the Stone (2010-2011) when the cube value is three cubed (27), the old 12:60 order will attain maximum implosion of mental ratios and resultant psychosocial dysfunctionality.

Diminishing cube ratios are also impacted by the “2012 factor”: increase of awareness of 2012 as a consciousness shift point, accelerates disbelief in and undermines deteriorating values of the old 12:60 order, such that the 2012 factor becomes a contributing element in the collapsing ratios of the annual timespace cubes.

If 2012 (Blue Resonant Storm year) = 1 cubed, the final unit in an exponentially decreasing order that began with 6 cubed, what and where is 2013? If 2013 = 0, then 0 is the value of the dimensional shift, i.e., it is non-quantifiable from the present perspective. This dimensional shift is a “quantum jump” into an altogether new timespace cube, the second creation, the new heaven and new earth, the galactic synchronization into a new mental-evolutionary order, “noosphere.”

Here we will find a new (para)normalization into a new cube, the Cube of 21 cubed, or the Original Matrix Attained  $21 \times 21 \times 21 = 9261$ , vigesimally, 1.3.3.1. Once again we will be cosmocentric, but now superconsciously so. The original timespace cube will again be unfathomably vast, for wherever we may find ourselves that will be its center, and no matter how far we may go, we will still be at its center.

That being the case, there will be little reason to go anywhere!

### 3. White Lunar Wizard Year—The God Particle as a Cosmic Fractal Value in the Timespace Cube

“Cosmic Science is an evolutionary cosmology, which is, at the same time, an evolutionary psychology. When we understand that our psychology is a cosmology and that cosmology is the psychology of the evolution of consciousness, then we will better understand the cosmocentric view.”

—Cosmic History Chronicles, Volume II Book of the Avatar, p. 265

In recent times, science circles have been abuzz with news of the theoretical definition of a new particle, referred to as the “God Particle.” What is it? Is it the primary particle accounting for “dark matter?” Is it a fifth force, in addition to the traditional four—electric, magnetic, weak and strong?

According to the “standard model,” as it is called by quantum physicists, the missing element in the understanding of the present-day perception of the building blocks of the universe—the physical universe that is—is the particle that causes the origin of all mass. So important is this missing theoretical particle that it came to be called the “God particle.”

Once it was theoretically defined, massive atom smashers in long underground circular tunnels, some 17 miles (27 kilometers) in length were brought—and are still being brought to bear down upon hapless protons traveling at incredible speeds, smashing into other protons. From the debris of billions of smashed protons scientists hope to find traces of the God particle. But so far not one has been seen!

Now a new round of atom smashing is set to occur with even more massive instruments, magnets, tubes and high-speed generators. Will the scientists find success? Or will it elude them again because perhaps they are operating with the wrong paradigm?

Let us consider the God particle from another perspective and see if we can’t find it in some other way, with a different paradigm, a different lens and the perceptions of cosmic science. Let us consider the God particle from the perspective of number, and expand its scale to accommodate not protons and electrons, but stars and planets, in which a planet is a solar electron, and the sun is a stellar nucleus.

First let us consider the key numbers involved in the God particle research. In June 1995, the physicist, Leon Lederman, working on mathematical constructs for the God particle, noted his calculations took him to a number, 10368. That happens to be  $144 \times 72$ ,  $\frac{1}{2}$  of 144 squared. That night he dreamed he had a key to a hotel room with the number 2808 written upon. He looked for the hotel room on two floors, before he realized that he had looked on the 27<sup>th</sup> and the 29<sup>th</sup> floors but not yet the 28<sup>th</sup>. Since he had never considered the number before, the physicist puzzled over its significance and then began doing further calculations.

These took him to the theoretical conclusion that 2808 is the energy voltage of the God particle and that 2808 is equivalent to a mass whose number is 82944. Now these two numbers are most interesting. The physicist considers these numbers as inseparable from the particle or the energy quantification, as if it were the function of the quanta to generate these numbers. But what if we consider that the particle is a function of number and, therefore, what is significant is the number and not the particle or quantum in question? What if the reality is that the quanta are functions of a dimension where meaning is in the number and not in the quantum being observed or measured?

In that light, let us look again at the numbers of the God particle, 2808, the Key, and 82944 the mass factor: 2808 is indeed the key. The 28th floor is the correct floor because 28 is the perfect number, the harmonic standard. The factors of 28, not including itself are 1, 2, 4, 7 and 14, which, added up, equal 28. Likewise,  $1+2+3+4+5+6+7 = 28$ .

This qualifies 28 as a perfect number. But 2808— $28 \times 100 + 8$ , is equally fascinating, for it a sum of 32 different factors, including 1 and itself. This is because, 2808 is a function of four base numbers: 3, 13, 8, and 9. Most interestingly, keeping in mind the diminishing sequence of the six annual cubes,  **$2808 = 216 \times 13$** .

Let us then assume the God particle is a function of the numbers 2808 and 82944, and that the combination of these two numbers provides a fractal standard of measure from nuclear physics to astrophysics. Let us also assume that timespace is a cube. While 2808 is the frequency of the force or motion of the God particle as a fractal element or factor in nature, then 82944 is the factor of the equivalent mass. The number 82944 equals 288 squared or  $144 \times 576$ . 288 ( $144 \times 2$ ) is the number of the frequency of polar light, and as a mass frequency value constant, would refer to the planetary sphere from whose poles emanate the auric rainbow light.

We can then postulate the God particle transposed to planetary level as the solar-electron mass (82944 frequency of polar light squared) traveling for one cycle around its nucleus/star, with an energy voltage frequency value constant 2808, the frequency of its timespace cube 216 multiplied by 13 moons.

As a key number on the 28<sup>th</sup> floor, 2808 =

$$1 \times 2808$$

$$2 \times 1404$$

$$3 \times 936$$

$$4 \times 702$$

$$6 \times 468$$

$$8 \times 351$$

$$9 \times 312$$

$$12 \times 234$$

$$13 \times 216$$

$$18 \times 156$$

$$24 \times 117$$

$$27 \times 104$$

$$26 \times 108$$

$$36 \times 78$$

$$39 \times 72$$

$$52 \times 54$$

Notice that the last two factors are the number of weeks in a ring, and the frequency of this year's Kin, White Lunar Wizard.

Now, we can imagine that the 216 cube (6 cubed) is stretched around the planetary orbit for a factor of 13 moons (28 days each, of course). Every 28 days, the 216 cube renews itself; this it does 13 times per orbit, attaining its value constant  $216 \times 13 = 2808$  per orbital cycle. When the day out of time arrives there is a timespace pause and then, a fractal compression occurs, so that the following day, the beginning of the second year (2008-09), the cube diminishes to a size 5 cubed (but still contained within the master six cube 216) such that the fractal timespace equivalence is now only 125, or  $216 - 91$ . Notice that the feature of 13 is still retained in the interval/difference of 91 or  $7 \times 13$ .

Remember 91 also has an analog relation to 28 in that, just as 28 is the sum of the numbers 1-7, 91 is the sum of the numbers 1-13. If we then multiply the 5 cubed factor of 125 by 13 moons we arrive at the sum 1625. This formulation would apply then to the frequency factors of the cubes of the remaining years.

We may then derive the following frequency figures for the six year passage of the planetary solar-electron V.24.3 in orbit around its stellar nucleus V.24 for a total of six rings, 2007-2013 (mass frequency harmonic of polar light squared 89244 remains constant):

1.  $216 \times 13 = 2808$  all encompassing God-particle force frequency.
2.  $125 \times 13 = 1625$ . Interval:  $2808 - 1625 = 1183 (91 \times 13)$
3.  $64 \times 13 = 832$ . Interval:  $1625 - 832 = 793 (61 \times 13)$
4.  $27 \times 13 = 351 (\times 8 = 2808 = 27 \times 104)$ . Interval:  $832 - 351 = 481 (13 \times 37)$
5.  $8 \times 13 = 104 (\times 27 = 2808)$ . Interval:  $351 - 104 = 247 (19 \times 13)$
6.  $1 \times 13 = 13 (\times 216 = 2808)$ . Interval:  $104 - 13 = 91 (7 \times 13)$

1. Sum of 13 moon frequencies of cubes 2-6 =  $2925 = 117 \times 25$ ,  
 $2925 - 2808 = 117 (9 \times 13)$   
 $2925 + 2808 = 5733 = 441 \times 13$

2. Sum of interval differences:  $1183 + 793 + 481 + 247 + 91 = 2795 = 13 \times 215$ ,  $2808 - 13$   
 Assume the 13 to be the value equivalent of the new timespace cube frequency beginning in 7.26.2013,  
 then  $2795 + 13 = 2808$  God particle electro-energy force constant. Then add the primary value 2808,  
 with the concluding value 2795:  
 $2808 + 2795 = 5603 = 431 \times 13 =$  timespace cube value at end of six year diminishing cube cycle up  
 through 25/7/2013.  
 But then on 26/7/2013, the new cube orbital value of 13 is established:  
 $5603 + 13 = 5616 = 2808 \times 2$ , noospherically amplified constant of God particle.

When we divide the mass equivalent 89244 by 2808 then we get a value that approximates the days in  
 the synodic moon cycle (new moon to new moon):

$82944$  divided by  $2808 = 29.53846154$   
 synodic lunation cycle = 29.5306 days

Following the analogy that the planet is a solar electron whose mass value is the harmonic of polar  
 light or 288 squared, the cycle of its satellite particle – the moon will also be a factor of the mass  
 divided by energy-force factor 2808.

Equally if not more significant is the value of 28 in relation to 82944:  $28 \times 2962 = 82936 + 8 = 82944$ ,  
 in other words  $2962 \times 28 (+08) = 82944$ . Also note the numbers of **288** are contained in **2808**.

From this, conclude that the planetary solar-electron, inclusive of its orbiting lunar particle is  
 completely a function of the God particle harmonic number values, 2808 and 82944.

6 cubed or  $216 \times 13(\text{moons}) = 2808 =$  orbital timespace cube value. This value subsumes and is the  
 basis of all other factors involved in the subsequent cube frequency values, where sum frequency value  
 of  $2925 = 117 \times 25 = 2808 + 117$ , and together the values = 5733 or  $441 \times 13$ .

$82944$  harmonic of polar light (144 N pole + 144 S pole) 288 squared  
 = equivalent mass frequency of orbiting solar electron, divided by 2808 = approximate value synodic  
 lunation cycle 29.5306 days.

The harmonic standard measure  $28 \times 2962 = 82936 + 8 = 82944 = 288$  squared.

What does Cosmic Science say about the God particle?

In the discussion on solar radiation there are two heavy particles, the *propositron* which releases thermic action, and the *electromegatron* which liberates luminic activity. Each of these heavy solar particles has two quanta, each of which has valence of 72, for a total valence of 144 for each particle. The combination of the two—propositron and electromegatron =  $144 \times 2$  or 288. The square of this factor gives us the mass equivalent value of the God particle, 82944.

Now while the two superparticles in question are elements of solar radiation that affect the thermic and luminic qualities of the solar-electron (planet), could it be that in their combination they might not have a synergized third function, which, when squared, creates the value equivalence accounting for the mass of the solar electron—or of mass in general?

Cosmic science would conclude by declaring: We are the God particle—our planet, the solar system, we ourselves, in our wholeness and consciousness totality of being and expression—yes it is we who are the missing element in all theories that forget about who is looking and who created who is looking.

#### 4. White Lunar Wizard Meets Black Iron Garuda Crest, Cubing the Challenge

“And we sent him on a mission to a 100,000 men or more.

“And they believed, so we allowed them to enjoy their life for a while.”

— Quran, Sura 37: 147-148

One fine afternoon in a distant land, yet so very close, White Lunar Wizard sat upon a rock meditating. The early spring sun brought a faint warmth to his cheeks, a slight breeze tousled his beard, now white as last winter's snow. He continued with his tummo breathing, catalyzing the light heat from within, until his veins and neural canals were fairly pounding with a radiant inner glow. Then he paused to clear his mind and receive the telepathic impulse of the moment.

As he gathered his breath, tuning into the subliminal periphery of his lucid awareness, a shadow fell across his eyes. Exhaling slowly through his slightly parted lips, while distilling the telepathic impression, he looked up. There before him was one strange being, or so he thought.

Two sturdy legs, with feet like a giant hawk, a magnificent feathered cape, or so it seemed, and a very interesting face, the most prominent feature being a nose resembling nothing so much as a fantastic bird's beak. Deep set eyes, glinting fiercely and wildly gazed out from beneath a great black iron head-piece. It was Black Iron Garuda Crest, or at least his projected double, immense, towering and magnificent.

White Lunar Wizard was most pleased for the encounter and with a hearty “Hey Ho!” he stood up on his feet. Even so, he still had to look up to gain a good look at the great being who faced him now.

“And what might it be that brings you out of the Solar Ring, Great Time Lord?” White Lunar Wizard queried, squinting his eyes to get a better look at this magnificent creature.

When he opened his beak-like apparatus to speak, great roaring, whooshing sounds came forth, almost melodic, but fierce and growling as well. At the same time, within his mind, White Lunar Wizard received the most astonishing telepathic message.

“I am projecting this form to you according to your capacity to perceive, O wizard! For if you could truly see me in my essence you would hardly be able to bear it. It would be like receiving an electrical shock of several million volts. But I come to you with a message from the Sirius Council of Nine.

“As you know, being a bearer of the Sirian time knowledge you have great responsibility. You appear, of course, only once every 52 rings. That is why your responsibility is even greater, and in this appearance, you are charged with a profound duty. You must begin now to prepare the Inner Heptagonon of Mind so when that time comes, once your brother, White Rhythmic Wizard arrives, it is ready for him to begin to gather the 144,000 and their remnant seeds, wherever they may be.”

“And how shall I go about that?” White Lunar Wizard could hear his voice as from afar. Once again from Black Iron Garuda Crest came the strange almost terrifying but hypnotic utterances. Simultaneously the sweet melodic telepathic voice continued its recitation in White Lunar Wizard’s mind.

“You must enter the cube meditation. You must construct the cube of six, the 216 cube, and place that around the Earth. The cube Samadhi is required of you. After every 28<sup>th</sup> day, you are to renew the cube, and you are to gather as many others as you can with you to maintain the cube samadhi. This is the only way we can hold the Earth within its timespace frame without its breaking apart. Once you have held this in place, it will remain, allowing each succeeding cube of each succeeding year to be constructed within the master cube of six.

“This is called cubing the challenge. For now the confusion and ignorance are rapidly increasing, the climate change is beyond control and the potential for absolute destruction is so great, that only by this invisible means can we maintain Velatropa 24.3 in its place until the closing of the cycle.

“The calm, unwavering samadhi that you maintain in this process is absolutely essential, for with each successive cube for the next four years, the madness and internal conflict will increase, provoking more and more acts of insanity. With each cube there is less timespace for more people to work out even more intense levels of confusion—until that system collapses. And when it does, we will all be happy that you established the master cube because it will still be there holding the timespace matrix of this planet in place. Then, when we pass through the eye of the needle it will be there to spring the original matrix from the solar core to the noosphere, bringing about a new race once again!”

“Yes, sir!” Lunar Wizard fairly shouted out, eager to meet his challenge. No sooner had the words left his mouth, than the apparition of Black Iron Garuda Crest began to dissolve. Still hovering but totally transparent now, Black Iron Garuda Crest, made one more utterance, before disappearing altogether.

“Call it Cubing the challenge O noble Wizard. Be like a magnet! Attract others to you who will assist in holding the meditation of the 216 cube around V.24.3 when ever they can.”

Climbing back up the hill, dappled with early spring flowers, White Lunar Wizard returned to his cave. Within a few moments he had taken up his meditation position. With intense and lucid focus he carefully envisioned the planet in orbit, and projected the 216 cube around it—a fine almost invisible yet slightly shimmering cube of monumental proportions holding together the timespace matrix of the embattled planet. At the center of the cube, holding it constant, he envisioned the planet as a solar electron rotating swiftly on its axis as it orbited its nucleus star.

At the same time, through his multidimensional capacity, he began sending out continuous streams of magnetic mentation waves, knowing that some of them would reach receptive targets. One would leave a mark in the fields. Others would enter the telepathic receptors of select beings. Soon he would not be alone in cubing the challenge. The solar electron God particle was on its way to becoming a fully conscious Element of the Great Plan.

“According to the final Program of Progress, everyone’s channel is open on your planet (in accordance with their levels of consciousness). either directly or through intuitions, and are still being opened.”
